Skive, 14 July 2015

### GOST-R:

Russian new regulations EAC, also known as TR CU (Technical Regulation of Custom Union), are effective and replace GOST-R.

The custom union between Russia, Kazakhstan, Belorussian and Armenia allows the clients, with one document, to move their products into all custom union countries

GOST-R certification stopped in 2012. The transission period expired 15.03.2015.

DEIF produces technical devices to be used by manufacturers of equipment as components and DEIF devices are not designed for independent use.

The HS and OKB custom numbers of DEIF units are out of scope according to CU TR and therefore the units are not requested to be EAC-certified.

DEIF units are in compliance with the CU Low Voltage Directive TR 004-2011 and the EMC Directive TR 020-2011.

In general, it is the policy of DEIF not only to comply with - but to be ahead of - relevant regulations. At the same time, it is the policy of DEIF always to supply products manufactured to standards providing our customers lasting and reliable solutions.

If you have any questions regarding the EAC compliance, please contact DEIF A/S headquarters at info@deif.com or tel: +45 9614 9614.

Best Regards,  
DEIF A/S

Søren Madsen  
Manager R&D Product Approval
