

Double voltmeter

Highly accurate & linear read-out

DEIF's double voltmeters with two moving iron systems mounted in one housing. Offering linear read-outs, they provide visual indication of frequency for manual synchronisation of generators to net (busbar).

General features

- ▶ Robust and thoroughly tested construction
- ▶ Available in Q96 DIN size design
- ▶ High accuracy
- ▶ High immunity to 3rd harmonics
- ▶ 150 to 600 V AC, 50/60 Hz

Variants

Features

2EVQ96	Dual diagonal pointers and scales
2EQ96	Dual pointers on common scale
