

Pointer Frequency Meter, FQ

High Accuracy and Immunity to 3rd Harmonics

With high immunity to 3rd harmonics, DEIF's Pointer Frequency Meter FQ is suitable for all applications.

The moving coil instrument features integrated electronics for converting frequency to analogue readings with accurate and linear readouts on an exchangeable scale.

Robust and tested to meet DEIF strict quality standards, the FQ is available in Q72 mm and Q96 mm sizes – Q144 mm on request.

FQ Features

- ✓ 0.5 accuracy class (1 for 45...65 Hz)
- ✓ 90° pointer deflection
- ✓ IP52 protection (IP54 on request)
- ✓ Measuring voltage: 100...220V AC or 230...440V AC ±15%
- ✓ Scale/measuring range: 45...55 Hz, 55...65 Hz, 45...65 Hz
- ✓ Scale: customised and exchangeable scale available for 90°
