

Load Sharing Unit, LSU-122DG

Var load sharing with AVR control

DEIF's Uni-line Load Sharing Unit, the LSU-122DG, offers var load sharing with AVR control between generators and interfaces to a governor through an electronic potentiometer (EPQ96-2 or EPN-110DN).

Suitable for control of diesel and gas generators, for instance, the LSU-122DG can control the power unit in stand-alone mode (performing frequency control) or parallel with other power units (performing frequency and power control).

The LSU-122DG has built-in power and frequency transducers that enable connection of external equipment. Constant power or isochronous mode is also possible. Speed control is conducted by two relays.

LSU-122D features

- ▶ Built-in power and frequency transducer
- ▶ Constant power or isochronous mode
- ▶ LED indication of status
- ▶ LED indication for activated control
- ▶ 35 mm DIN rail or base mounting

LSU-122DG type approvals
